

NEW EARTHMOVING MACHINES FOR SCM MINING TEAM

The Engineering department's EMV section recently handed over newly procured Earthmoving machines to the Mining team in SCM, in support of the implementation of the long term plan. The equipment which consist of PC600, PC210, PCR210, Dozer, Transvac suction units and associated silo bins. forms part of the 6th Bedrock Cleaning team that started up on 10 June 2022.

The handover that took place at the G100, was overseen by Elton Josea (Section Engineer - EMV) and Ngeno Mutilitha (Process Manager - Bedrock Cleaning).

As we continue to do great things today, for a better tomorrow, we look forward to safely mining many square metres to 2042 and beyond!
