CELEBRATING WORLD ENGINEERING DAY

March 4th was World Engineering Day (WED) celebrated worldwide under the theme “Engineering the Cities of the Future”, in recognition of the contribution by the engineering profession to the development and advancement of the world.

PK encouraged the teams to continue working safely and take pride in their engineering work. He further challenged the teams to continuously be creative and innovative with a focus on Precision Maintenance so that Namdeb can move the dial towards a High Reliability Organisation (HRO).

In celebrating the day, Namdeb’s Acting Engineering Manager, Pankratius Kondjamba (PK), accompanied by Tuli Nafuka (EMV Divisional Engineer) and Wendelin Muyamba (Divisional Engineer for SCM Plants Engineering), on Friday morning, 3 March 2023, visited some engineering workshops and sites in Southern Coastal Mine for a meet and greet with engineering teams. At the same time, the visit was also aimed at creating an opportunity to reflect on the contribution that the teams make to themselves, the company and the at large.

The walkabout was highly appreciated by the teams visited and called for more engagement sessions of the nature.
