# NAMDEB APPOINTS PK AS ENGINEERING MANAGER

**Pankratius (PK) Kondjamba has been substantially appointed as Namdeb's Engineering Manager effective 01 December 2023. PK was acting in the role and his appointment is the result of a successful recruitment process.**

Describing himself as a passionate professional engineer, PK holds a Bachelor of Science in Electrical Engineering from the University of Cape Town, as well as a master's in business administration from Steinbeis University Berlin in Germany.

PK recently led the Engineering team in hosting a festive themed engagement session for leaders across Namdeb. He acknowledged the adoption and embracing of innovation which had fueled much of the excitement for those who attended. He also proudly highlighted that in line with Namdeb's focus on inclusion and diversity, newly appointed young talent, had played a key role in determining the content and the intentional drive to maximize existing platforms in an innovative way.

At the same platform, Namdeb's CEO Riaan Burger could not contain his pride for the Namdeb Team's achievement for 2023. In reflecting on the incredible journey that supports Namdeb's purpose of Mining for Good, he emphasized the milestones achieved with the completion of major ramp-up requirements and effectively scaling up of operations as envisaged with the new Long-Term plan.

The CEO reiterated that the Namdeb journey is characterized by resilience, teamwork and hard work which is testament that Namdeb is the Pride of Namibia's Mining – to 2050 and beyond. He further added that turning the business around from having faced closure to a 20-year lease on life is no ordinary achievement. This collective accomplishment contributes to ensuring a better tomorrow for the business, community, and Namibia at large.
